### WORK EXPERIENCE

- **SkyScanner | Front-End Developer | July 2022**  
I worked as a front end software engineer in their virtual experience program. My role was to write and style the front-end components in React.js backpack that meet the requirements.

### PROJECTS

- **TextUtils | React, Bootstrap**  
In this project, I made a react web app which have key features like Text to Speech, Word Counter, Reading time of a document and text editor.
- **Blogging Site | MongoDB, Node, Express, Bootstrap**  
In this project, I made a blogging website where users can register, login, add, remove, update their blogs as well as add their favourite blogs to favourite section and also on the security side non register users cannot access it.
- **Restful API | MongoDB, Node.js, Express**  
In this project, I developed a Restful API which can do all crud operations. Users and admin can login, register using token based authentication and all routes are protected.
- **Chat App | React, Tailwind**  
In this project, I developed a react chat app where two persons can chat with each other.
- **Calculator | React, Tailwind**  
In this project, I make a RESPONSIVE calculator having a UI just like a calculator in iPhone which can do all mathematical calculations.
- **Popup CV | HTML, CSS, JS, jQuery**  
In this project, I made a CV and hide it on the webpage. When user click on the button the CV will show on the full webpage and it is responsive on all the screens.
- **Restaurant Site | HTML, CSS**  
In this project, I made a restaurant site UI which was SUPER RESPONSIVE on all the screens.
- **E-commerce BookStore | Wordpress**  
In this project, I made a successful E-commerce Bookstore on the Wordpress for the bookstore online business and integrate number of features in it.
- **Portfolio Website | Wordpress, DIVI**  
In this project, I made my 3 pages website to show my portfolio.
