WORK EXPERIEINCE

- **SkyScanner | Front-End Developer | July 2022**
  I worked as a front end software engineer in their virtual experience program. My role was to write and style the front-end components in React.js backpack that meet the requirements.

PROJECTS

- **Blogging Site | MongoDB, Node, Express, Bootstrap**
  In this project I make a blogging website where users can do all crud operations, login, signup, add to favourites their blogs and all routes were protected.

- **Restful API | MongoDB, Node.js, Express**
  In this project I developed a restful api which can do all crud operations and user can also login, register using token based authentication and test it on postman.

- **Chat App | React, Tailwind**
  In this project I developed a simple chat app for my learning in which two users can chat with each other.

- **Popup CV | HTML, CSS, JS, jQuery**
  In this project I make a CV and hide it on the webpage. When user click on the button the CV will show on the full webpage and was responsive on all the screens.

- **Calculator | HTML, CSS, JS**
  In this project I make a RESPONSIVE calculator having a UI just like a calculator in iPhone which can do all operations.

- **Restaurant Site | HTML, CSS**
  In this project I made a restaurant site UI which was SUPER RESPONSIVE on all the screens.

- **E-commerce BookStore | Wordpress**
  In this project I made an E-commerce web store on the Wordpress and integrate WhatsApp feature in it which was running for about a year.

- **Portfolio Website | Wordpress, DIVI**
  In this project I made my 3 page portfolio website to practice my Wordpress web development skills.
